Yuliya, 15
I have tried different kinds of sport before I started cheerleading in my club in Surgut. For me it's a perfect 1) ... of dancing, acrobatics, gymnastics and it's a bright show, of course! It's a common kind of sport in America - almost every college has 2) ... own team and pop stars like Madonna and even some of the US presidents used to go into this sport. It has been called a pre-Olympic kind of sport recently! Though for us it's quite new. We hope cheerleading will become popular in Ugra too.

Vadim, 16
It was the World Chess Olympics in Khanty-Mansiysk and my father took me to the Chess Academy. I was 3) ... to see and play huge chess pieces in the hall. I was 6. Then we had chess classes in the kindergarten and at primary school. Chess is very popular in Ugra and I can take part 5) ... lots of competitions. Even the next World Chess Olympics if I'm lucky enough.

Daniyar, 16
I always liked to play computer games. 3 years ago I met some cool guys and we tried to play as a cyber-sport team. In 2019 we played for the Surgut district at UGRA OPEN and you know what! We became the third in The World of Tanks among 28 teams from Russia, the Ukraine, Morocco and 7 other countries. The money fund of the competition was 750,000 roubles. Some international Dota 2 tournaments have multimillion dollars pools.

Vladislav, 15
Fishing is a 6) ... way to get food or a hobby for those who like to be in nature. My dad, granddad and me - we all love fishing on the Nurmjo lake near our village! Last year we took part in Winter Fishing Championships in Sogom. There are strict rules of fishing and the weight of the fish is important. Small ones are to be let back into the water. Our family 7) ... didn't win though we caught some 2-kg pikes and a large perch. Anyway we had a lot of fun as there were also national games, fishing gear master classes, a concert and a lot of tasty fish. In August we are going to take part in a fishing festival in Khanty-Mansiysk. They promise a rock concert after the competition!

The sportswomen are strong and beautiful. We often see them when they are training. They are fantastic! Every girl from my group wants to be just like them, so we train every day in the gym and swim a lot! We also do special exercises with a ball.

I work hard every day because I want to become an Olympic champion, too. I enjoy what I do and I really like my school!

Формирование экологической культуры

If you come to Surgut, the biggest city of Ugra, you'll land in Farman Salmanov airport. If you live there you might even go to a school named after him as well. In fact if you walk around the streets of this city you'll see many names on street signs, such as Gubkin, Vasilyev and Bystritsky. But why is this and who were these people? You might be surprised to hear that they were all incredible pioneers who played a huge role in industry and the development of Ugra. Through their hard work and spirit of adventure they laid the foundations for the oil and gas industries that still support and power Ugra today.

Our story starts about 100 years ago, when an academic called Ivan Gubkin assumed control of enormous oil and gas reserves in the West Siberian Lowland. In 1935 the first Soviet expedition headed by a brave 24-year old engineer, named Victor Vasilyev, found oil near the Yugan River. Just imagine the conditions these intrepid explorers had to work in during those difficult times: severe frosts, lack of electricity and food and tons of equipment to be brought by horses as the nearest railway was 1,000 km away.

But the story doesn't end here. Later, in September 1953, work continued and a geological expedition led by Alexander Bystritsky found the first gas in the region. It was during this period that another brave pioneer of Siberian oil came to Ugra. That man was Farman Salmanov from Azerbaijan, who dreamed of mighty rivers and vast forests and always wanted to be an oilman because of his grandpa's exciting stories! Salmanov was originally sent to find oil in Kuzbass.

But he broke the order and brought his people to Surgut instead. He was sure he could find oil there and wouldn't give up. And find oil they did! Farman Salmanov took part in the discovery of more than 130 out of the 480 oil and gas fields in Ugra!

Later, in 1965, a gush of oil that came out of the well near Lake Samotlor would change Ugra forever. The drilling which began in winter 1968 is often called "the battle of Samotlor" because the temperature dropped below -60° Celsius! It was so bitterly cold that diesel oil got frozen and thick metal pipes burst! Even so, the people continued to work and battle against the elements. One of the streets in Megion is named after the drill master, Grigory Norkin, in honour of his courage. In fact the cities of Megion and Nizhnevartovsk exist only because of these important discoveries.

Today, Samotlor is the biggest oilfield in Ugra and the 6th largest oil reserve in the world! Almost a quarter of the 12 billion tons of oil extracted in Ugra is from Samotlor. Thanks to this Ugra takes 1st place in Russia! The 112,000 km length of the oil pipes is enough to cover 2.5 equators! Over 100 companies work there now and give jobs to hundreds of thousands of people. To learn more about this fascinating period of history you can visit the Museum of Geology, Oil and Gas in Khanty-Mansiysk. So, the next time you walk through the streets of Surgut, stop for a moment and spare a thought for those brave people and their struggles against incredible odds.

10 We have witnessed recent rise of awareness of disability related issues including different kinds of adaptive sports. Read the posts on social networks. What do people say about the disabled people? What arguments are there behind their opinion? You may use the following phrases to answer the questions: use dotted parts, choose statements, strengthen arguments, or give advice.

1 I lost my arm when I was a boy. Specialists from the Adaptive Sports Centre of Ugra helped me to live through it, and also taught me to live sport. I had been dreaming to go to Paralympic Games since I was 14. I managed to do it when I turned 22 at the XVIII Winter Deaflympics held in Khanty-Mansiysk and my results were pretty good. Aim at your goals in life, have faith in yourself, and you will make your dreams come true. *Mikhail, 24*

2 My friend is in a wheelchair, and I think she is strong, clever and cool! She has more vitality than anybody else. I want more people with disabilities to enjoy life! I want them to believe that they can win the mountain top. That's why I have become a volunteer, and it is right for me! *Dasha, 16*

3 Big cities have more opportunities for disabled persons. For example, there are more special ramps for people in wheelchairs. There are great adaptive sport centres. But there are a lot of small settlements in the region and sometimes disabled people who live there lack prospects. There should be more opportunities for them. I definitely approve of the public organisations that help our special children to adapt. *Valentina, 52*

4 Sport is very important for a child with disability. Going in for sport makes him or her feel better and helps realise the child's potential. The Adaptive Sports Centre of Ugra organizes sledge hockey trainings. I am sure this is not just rehabilitation but also the first step to a World Olympics. We are bound to develop such sport directions. *Alena, 32*
